Summary

Frontend Engineer with 2 years of experience building scalable multi-tenant SaaS products using React.js (v18), TypeScript, and Redux Toolkit. Strong expertise in component lifecycle management, large-scale state architecture, performance optimization, and secure REST API integrations. Experienced in Agile environments, cross-functional collaboration, and CI/CD workflows. Delivered production systems handling 10,000+ records with measurable engagement growth.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React.js (Hooks, Functional Components, Component Lifecycle), Redux Toolkit, React Query
- **Testing:** Jest, React Testing Library, Unit Testing
- **Performance:** Code Splitting, Lazy Loading, Memoization, Render Optimization, Web Vitals
- **API & Auth:** REST APIs, Axios, OAuth 2.0, JWT Authentication
- **Styling:** Tailwind CSS, CSS Modules, Styled Components, Responsive Design
- **Tools & Workflow:** Git, GitHub, CI/CD, Vite, Webpack, Chrome DevTools, Postman, Agile/Scrum

Experience

Frontend Software Engineer (Promoted) — TeksMobile (Eventify SaaS), Kolkata **Oct 2024 – Present**

- Led frontend architecture of core SaaS modules, enhancing scalability and user experience, contributing to 30% engagement growth.
- Designed scalable Redux Toolkit state management handling 10,000+ records with optimized filtering, debounced search, pagination, and infinite scrolling.
- Improved application performance by implementing memoization (React.memo, useMemo), route-based code splitting, and render optimization, reducing unnecessary re-renders by 40% and improving initial load time by 28%.
- Collaborated with 4+ backend engineers and 2 designers in bi-weekly Agile sprints, delivering 15+ production features across CRM and event modules with 95% on-time sprint completion.
- Contributed to CI/CD workflows (GitHub Actions) and implemented structured testing (Jest, React Testing Library), reducing production bugs by 30% and improving deployment stability.
- Leveraged AI-assisted development tools (Claude, ChatGPT) for complex debugging, refactoring legacy components, and generating unit test cases, reducing feature development turnaround time by approximately 20%.

Software Developer Trainee — TeksMobile (Eventify SaaS), Kolkata **Apr 2024 – Sep 2024**

- Engineered a scalable CRM and lead automation platform using React.js, TypeScript, Laravel, and MySQL to manage end-to-end lead lifecycle (capture → nurture → demo → conversion), improving operational efficiency by 25%.
- Designed and implemented an automated email and meeting workflow integrating Google Calendar, HubSpot, Apollo.io, SmartLead, and WhatsApp Business APIs, reducing email bounce rate by 35% and increasing demo booking engagement by 40%.
- Built a dynamic meeting-slot scheduling system (Google Calendar–like interface) enabling real-time slot booking, automated confirmations, and rescheduling, significantly improving lead response time and customer experience.
- Developed activity tracking and status-based lead pipelines with automated state transitions, improving follow-up consistency and increasing overall lead engagement rate by 30%.

Projects

CollabCode — Real-Time Collaborative Code Editor
GitHub Repository

- Built a real-time collaborative code editor using React, TypeScript, WebSockets, Node.js enabling multi-user live editing.
- Implemented optimized state synchronization and conflict handling to maintain low-latency updates.
- Designed modular component architecture and improved rendering performance using memoization techniques.
- Applied clean folder structure, reusable hooks, and scalable frontend patterns suitable for production-grade systems.

Achievements

- Solved 300+ LeetCode problems demonstrating strong Data Structures and Algorithms proficiency.
- Completed "Mastering Data Structures and Algorithms using C/C++" — Udemy (2024).

Education

Bachelor of Technology, Information Technology 2020–2024
Haldia Institute of Technology CGPA: 8.4
